Bio

My name is Prajwal Maltesh Harnalli. I am a 3rd-semester B.Tech student studying Computer Science and Information Technology (CSIT) at REVA University in Bengaluru. I am a software developer with a strong focus on full-stack web development, data analysis, and continuous algorithmic problem-solving.

Coursework & Projects

Activities 1 & 2: Foundations

I established my development environment and version control workflows by configuring VS Code, Git, and GitHub, resulting in my foundational Hello World repository.

Activity 3: Collaboration

Using GitLens and Live Share, I pair-programmed with my teammate Malli to build a comprehensive terminal line editor program in C. We successfully implemented text insertion, deletion, search, replace, and undo functionalities.

Activity 4: Algorithmic Progress

I maintain dedicated LEETCODE and HackerRank-3rdSem-Portfolio repositories on my GitHub to document my ongoing problem-solving solutions and algorithm training.

Additional Work

I recently designed and implemented a club member management platform featuring dynamic UI grids, event attendance filters, and task assignment modals using HTML, CSS, and JavaScript. I also actively prepare problem statement proposals for the Smart India Hackathon.

Career Goal

To continuously expand my full-stack engineering capabilities to build scalable, user-centric web applications while exploring AI-driven software solutions.

Projects at a Glance

Work	What I built	Tools	Outcome
Activities 1 & 2	Hello World repository	VS Code, Git, GitHub	Working dev environment and version control workflow
Activity 3	Terminal line editor, built in a pair with Malli	C, GitLens, Live Share	Text insertion, deletion, search, replace, and undo
Activity 4	Algorithm training repositories	LEETCODE, HackerRank-3rdSem-Portfolio	Ongoing, documented problem-solving solutions
Additional work	Club member management platform	HTML, CSS, JavaScript	Dynamic UI grids, event attendance filters, task assignment modals

Technical Skills

Languages C, C++, Python, Java, SQL, HTML, CSS, JavaScript

Frameworks & Tools React, Vite, Tailwind CSS, Express, Supabase, Git, VS Code

Where I'm Headed

The work above points in four directions, all tied to my career goal:

- **Deepen full-stack skills.** Build on my HTML, CSS, and JavaScript projects with React, Vite, Express, and Supabase to create scalable, user-centric web applications.
- **Keep the algorithm habit.** Continue documenting daily problem-solving in my LEETCODE and HackerRank-3rdSem-Portfolio repositories.
- **Take on team challenges.** Keep preparing Smart India Hackathon problem statement proposals and keep collaborating, as I did with Malli in Activity 3.
- **Explore AI-driven software.** Apply my data analysis interest to AI-driven solutions as my full-stack foundation grows.
